Operating System	<ul style="list-style-type: none">• Windows, Linux
S/W Tools	<ul style="list-style-type: none">• MS-Offics, MS Teams

Work Experience

Compunnel Digital

Aug 2019 – Present

Software Engineer

Noida, Uttar Pradesh

- ✚ Compunnel Digital is a professional IT consulting and services firm specializing in digital business transformation.
- ✚ Developed, maintained, and fixed bugs for multiple projects and provided 85% code coverage with unit tests.
- ✚ Created backend micro-services to facilitate Data migration, Automate-transactions and multiple API-Adapters or connectors for Automated communication with Services.

WaveNet Solutions Pvt Ltd

May 2017 -Jun 2017

Intern

Gurugram, Haryana

- ✚ Attained the knowledge about the workings of various devices related to IoT that were available in the Company.
- ✚ Learned to use some software partially like Atmel Studio, XCTU.
- ✚ Experienced how the work is being done in the IT Industry.

Projects

BRIO

July 2020 – Present

- ✚ A system to manage orders from different marketplaces and forwarding to respective fulfillers while keeping track of 3PLs performance.
- ✚ Created several Micro-services using AWS Lambda and deployed them to the account using the Cloudformation Templates and AWS Developer tools I.e., CodeCommit, CodeBuild and Codepipeline.
- ✚ These micro-services were used to connect BRIO with multiple API's the ones I connected it with include: UPS Efulfillment, OrangeConnex, JD logistics, Unicommerce, AliExpress, eBay.

Hunt Servicing

Feb 2020 – July-2020

- ✚ Hunt is a project for a Bank which works with Transactions, Loans and Liens. The aim for this project was to provide an interface that will manage all these transactions seamlessly.
- ✚ Created a Transaction rule engine that will take decisions based on a rule json and the Input which will make a tree of AWS lambda's calling each other to Complete a transaction through multiple paths.
- ✚ Designed a Data migration System that will move the data from CSV's Uploaded from UI to DB using various AWS lambda to do validations and transformations.

Feedback Management Application (Independent)

Jan 2019 - April 2019

- ✚ Created a web application that works as a feedback management system. It has different interfaces for recruiters, managers, and Admin.
- ✚ The web application was made using python specifically modules like flask, sqlalchemy. Designed all the web pages using HTML5 and CSS3.
- ✚ Deployed the python web application on AWS using RDS MySql for storing the data and Elastic Beanstalk to deploy the web application.
