

AJAYPAL YADAV Mob: +91-8851044876 E-Mail: - y.ajaypal92@gmail.com		Role / Designation: Developer / Sr Analyst Programmer Employer: Fidelity International Experience: 6 Year (Onsite-London (UK) Experience)
Summary- Informatica Developer, Snowflake Developer, Oracle PL-SQL Developer, OBIEE Developer		
	<ul style="list-style-type: none">Around 6 years of relevant IT experience, highly skilled and capable ETL(Informatica) Developer specialized in Data Warehousing and Reporting (OBIEE). Develop Strategies for Extraction, Transformation and Loading mechanisms using Informatica on Oracle database. End to end Working experience with Snowflake cloud DB end. Knowledge of working with Production Support. Adept at building complex logic which satisfies customer needs. Able to adapt work approach quickly in response to evolving client needs. Extensive hands-on experience in integration of various data sources like oracle and Flat Files. OBIEE: -RPD, Dashboard creation, creation of reports etc. Currently working on Financial domain and Real estate Investing.	
Professional summary		
	<ul style="list-style-type: none">6 years of IT experience in Agile and various stages of Software Development Life Cycle (SDLC) including requirements analysis, design, development, testing, implementation and Production support.Won 2 GOC Team award (2019/2020) and 3 On Spot award. Got Nominated 5 time for On-Spot during my 3 year of tenure with Fidelity.SPOC for all technical/Function aspects for Real Estate Business.Understanding of the Data Warehousing concepts and Business Intelligence concepts.End to End working Experience on to Snowflake Cloud DB (AWS)Working on Informatica Power Center 9.5/10.1 including all phases of the BI implementation viz. Creating Mappings, Sessions, WorkflowsWorking experience on Informatica Admin activity and upgrade task.Worked onto Various upgrade task like Informatica, OBIEE, Unix, Oracle etc.Working Experience onto Financial domain and extensive functional understanding Real estate investing.Worked on Control M Post Install Automation using Python and OBIEE 12c Customization.Worked with Control –M Automation and SVN.Working Experience with Production Support i.e. Handling the support ticket for the ETL jobs.Working experience (expertise level) in OBIEE 11g & 12c: -RPD, Dashboard creation, creation of reports etc.Working experience in Oracle development – Stored procedure, trigger, function, cursors.Experience in working with UNIX script, ETL knowledge, data cleansing.Optimized the ETL process using performance-tuning methods.Strong business understanding of Retail and Supply chain management and financial Services.Highly motivated to learn new developments in technology and have strong analytical problem-solving skills.A quick learner, self-motivated, enthusiastic and team player.	
Technological skills:		
ETL	Informatica (9.5 &10.1), Informatica tdm	
Reporting	OBIEE 11g & 12C, Basic Web focus	

RDBMS	Oracle 11g, Oracle 12c
Cloud DB	Snowflake DB
Language	SQL / PL SQL, Unix Script, Python, Java-script
Operating System	Window 7, Unix
Tools	Putty, Informatica Power Center, Microsoft Visual Studio, SVN, Control-M, Urban Deploy, Nifi

Experience details

- Working with **HCL Technology** from **FEB 2015 to FEB 2018**.
- Working with **Fidelity International** from **FEB 2018 to till date**.

Project Experience Summary

Project Name & Description	Tools/Technologies Used	Role
Polymer Group Inc.	Informatica 9.5.1, OBIEE , Oracle 11g, SQL, Putty and Unix script	Developer
SKF	Informatica 9.5.1, OBIEE , Oracle 11g, SQL, Putty and Unix script	Developer
Ceva Logistics	Informatica 9.5.0, OBIEE , Oracle 11g, Unix shell scripting, Putty	Developer
DARS(DISCOVERY)	Informatica 10, OBIEE 11g & 12c, Oracle 11g & 12C, Times Ten, Unix, Putty, Control M, IMDB, SVN, Python, Urban-Deploy	Developer
Real Estate Investing	Oracle, Snowflake , Python, Java-script, OBIEE, Apex, Control-M, Urban-Deploy	Developer

POLYMER GROUP INC. (FEB 2015 TO JUN 2015)

The Polymer Group Inc. (PGI) rebranded as AVINTIV is a leading global engineered materials company founded in North Carolina, USA in 1992. It is primarily focused on the production of Nonwovens for the hygiene, healthcare, wipes, technical specialty, Building and geo-synthetics market. The project includes the extraction and transformation of data (Oracle and Flat file system) from one source system and loading transformed data into another source system.

Role: Developer

Team Size: 5 Offshore/3 Onshore

Responsibilities: As part of the development team my Role is to:

- Working as BI Developer responsible for Extraction Data from Legacy system Oracle & Flat File.
- Transformation of Data as per Rule and logic
- Using Informatica reusability at various levels of development.
- Performing data manipulations using various Informatica
- Transformations like Filter, Expression, Look-up, Aggregator, Update Strategy, Joiner, Router, Sorter and Union.
- OBIEE: -RPD, Dashboard creation, creation of reports etc.
- Developing Workflows using task developer, Worklet designer and workflow designer in Workflow manager and monitoring the results using workflow monitor.
- Participating in daily status meetings and conducting internal and external reviews as well as formal walk through among various teams and documenting the proceedings.

SKF (JUN 2015 TO SEPT 2015)

SKF, Svenska Kullagerfabriken AB is a leading bearing and seal manufacturing company founded in Gothenburg, Sweden in 1907. The company manufactures and supplies bearings, seals, lubrication and lubrication systems, maintenance products, mechatronics products, power transmission products, condition monitoring systems and related services globally has been listed as one of the largest companies in Sweden and among largest public companies in the world according to Forbes Global 2000 ranking. The project includes Migration the OBIEE 10g Report and dashboard to OBIEE 11g. It includes the data extraction and transformation of data (Oracle and Flat file system) from one source system and loading transformed data into another source system. Also, Migration of RPD in 11g and creating Report & Dashboard, Creating Role, Securities etc.

Role: Developer

Team Size: 5 Offshore/2 Onshore

Responsibilities: As part of the development team my Role is to:

- Working as ETL Developer responsible for Extraction Data from Legacy system Oracle & Flat File.
- Transformation of Data as per Rule and logic.
- Using Informatica reusability at various levels of development.
- Performing data manipulations using various Informatica Transformations like Filter, Expression, Look-up, Aggregator, Update Strategy, Joiner, Router, Sorter and Union.
- Developing Workflows using task developer, Worklet designer and workflow designer in Workflow manager and monitoring the results using workflow monitor.
- Working with RPD - create Hierarchies and working with variables & Initialization Blocks.
- Creating User and assigning Role, Securities in OBIEE 11g, Dashboard & Analysis Creation
- Participating in daily status meetings and conducting internal and external reviews as well as formal walk through among various teams and documenting the proceedings.

CEVA LOGISTICS (OCT. 2015 TO FEB. 2018)

CEVA Logistics of the world's leading non-asset-based supply chain management companies, company design and implement industry-leading solutions in both freight management and contract logistics. Company is working in 17 regional clusters around the globe, deliver operational excellence - to provide viable answers to the most challenging supply chain questions. CEVA applies its renowned operational expertise to provide best-in-class services across its integrated worldwide network, where the focus is equally on general business and the specialist needs of the automotive, consumer & retail, energy, healthcare, industrial & aerospace and technology sectors.

Role: Developer

Team Size: 3 Offshore/2 Onshore

Responsibilities: As part of the Enhancement team my Role is to:

- Collect the new requests and well as change requests from client.
- Understand the requirement and propose the solution.
- Implementing the changes and performing the unit testing.
- Documenting the changes done.
- Providing Support for the Ticket based on the ETL jobs.
- Using Informatica reusability at various levels of development.
- Creating data loads using various Informatica Transformations like Filter, Expression, Look-up, Aggregator, stored procedure, Update Strategy, Joiner, Router, Sorter and Union.
- Developing Workflows using task developer, Worklet designer and workflow designer in Workflow manager and monitoring the results using workflow monitor.
- Working with RPD - create Hierarchies and working with variables & Initialization Blocks.
- Creating User and assigning Role, Securities in OBIEE 11g, Dashboard & Analysis Creation.
- Creating and using functions and procedures at various level in development.
- Participating in weekly status meetings and conducting internal and external reviews as well as formal walk through among various teams and documenting the proceedings.

FIDELITY INTERNATIONAL (2019 TO PRESENT)

Fidelity is Investment Management Company, I have Joined as ETL developer for DARS Team, Project is related to Providing solution to Customer or PM to provide the Financial Solution. We are Consumer of Data Coming from Different to Sources and Providing the Solution so that customer can take better Decision.

Project - DARS

Role: Developer

Team Size: 10 Offshore

Responsibilities: As part of the Developer team my Role is to:

- Collect the new requests and well as change requests from BA's.
- Understand the requirement and propose the solution.
- Implementing the changes and performing the unit testing.
- Documenting the changes done.
- Using Informatica reusability at various levels of development.
- Creating data loads using various Informatica Transformations like Filter, Expression, Look-up, Aggregator, stored procedure, Update Strategy, Joiner, Router, Sorter and Union.
- Developing Workflows using task developer, Worklet designer and workflow designer in Workflow manager and monitoring the results using workflow monitor.
- Working with SVN, Urban Deploy and SVN
- Working with RPD - create Hierarchies and working with variables & Initialization Blocks.
- Creating User and assigning Role, Securities in OBIEE 11g, Dashboard & Analysis Creation.

- Creating and using functions and procedures at various level in development.
- Participating in Daily status meetings and conducting internal and external reviews as well as formal walk through among various teams and documenting the proceedings.

Project- Real Estate Investing (REPortal & RESDP)

Role: Developer

Team Size: 3 Onsite/Offsite

Responsibilities: As part of the Real estate investing project, I am single Point of contact for all the technical & functional aspects. My role is described below:

- Collect the new requests and well as change requests from BA's.
- Understand the requirement and propose the solution.
- Implementing the changes and performing the unit testing.
- Documenting the changes done.
- Using Informatica reusability at various levels of development.
- Creating data loads using various Informatica Transformations like Filter, Expression, Look-up, Aggregator, stored procedure, Update Strategy, Joiner, Router, Sorter and Union.
- Developing Workflows using task developer, Worklet designer and workflow designer in Workflow manager and monitoring the results using workflow monitor.
- Working with SVN, Urban Deploy and SVN
- Working with RPD - create Hierarchies and working with variables & Initialization Blocks.
- Creating User and assigning Role, Securities in OBIEE 11g, Dashboard & Analysis Creation.
- Creating and using functions and procedures at various level in development.
- Participating in Daily status meetings and conducting internal and external reviews as well as formal walk through among various teams and documenting the proceedings.
- Worked on Various upgrades with the project.
- Currently working on data migration from oracle to Snowflake Cloud DB.
- Worked on Python framework for multiple tasks.
- Won 2 GOC and 3 On-spot award and Visited on-site (London, UK) for real estate project.

Educational qualification

- B. Tech in Electronics and Communication Engineering from Jodhpur National University with aggregate of 76% in 2014.
- 12th Pass from RBSE (State Board), B.L Sr. Sec. School with an aggregate of 83% in 2009.
- 10th Pass from RBSE (State Board), Govt. Sec. School Lambi-Sahad with an aggregate of 75% in 2007.
