## **PROJECTS UNDERTAKEN**

### **Newgen Software Technologies Ltd.**

#### **MORTH – Audit Para**

- Every Govt. Organization has a specific process to perform their audits (both internal and external). Every year auditors can perform audits and both auditors and auditee can view previous audits for reference through web portal which will be integrated with the Newgen DMS solution. If required, auditors/auditees can attach various documents (Digitized or E-Files) as supporting in the solution and push it to the respective officer to take proper initiative against it.

#### **Role:**

- Designed the application form for Audit Para where audit schedule details such as type of audit, Audit Date From, Audit Date To etc. would be filled by the auditor using Javascript.
- Handled the action flows which have to taken at various worksteps using SQL.
- Currently, developing the process/workflow using Core Java as to how the application form would be processed from the Auditor workstep to the Auditee workstep.

#### **First Citizen Bank – RLOS/CLOS**

- First Citizen Bank project is designed to account the flow of process of applying the loan regarding RLOS and CLOS mentioning the retail and corporate loan according to the customer requirement. So the flow of loan applying is first passes through load Tracking, Branch, Head Office & Approval, Offer Letter, Security & Legal. There are different forms were created and particular forms attached with respective workitem. This helps to overcome the problem created during the paper work for applying the loan and makes the work easy digitally.

#### **Role:**

- Developed several APIs which are used in this project.
- Handled the customer data migration through Utilities.
- Server Side coding using Java and implementation of RESTful Web Services.
- Also worked on the database side using MySQL server.

### **Kenmax Business Solutions Pvt. Ltd.**

#### **Induction Feedback**

- This project describes that when an organization hires new employees, it must provide training to them. To know about the trainer's performance, organization takes the feedback of the trainer through this product.

#### **Role:**

- Worked on designing the Induction Feedback Form through HTML, CSS, Javascript, Bootstrap, JQuery and AJAX.
- Also worked on data saving part in the backend through Core Java and SQL.
